STEPHANIE BAO

stephbao.github.io/portfolio | sbao@andrew.cmu.edu | 410.782.9760

EDUCATION

Carnegie Mellon University

B.S. in Statistics & Machine Learning Additional major in HCl Dec. 2018 | GPA: 3.44

SKILLS

Python

MySQL, PostgreSQL HTML/CSS

Javascript

User Research Rapid Prototyping

Sketch

Adobe InDesign Adobe Ilustrator

InVision Balsamiq

COURSEWORK

05-410 User-Centered Research and Evaluation

05-430 Programming User Interfaces 05-650 Interaction Design Studio 51-261 Communication Design Fund.

10-601 Intro. to Machine Learning 15-122 Princ. of Imperative Comput. 05-434 Applied Machine Learning

36-402 Adv. Methods for Data Anlys. 36-462 Special Topics: Data Mining

ACTIVITIES

PHOFNIX

Public Relations/Newsletter Chair An interest group under CMU's Multicultural Greek Council looking to recharter a sorority. Looking to create a supportive community of women with an emphasis on academics & culture.

EXPERIENCE

ClassInSight Project

Aug 2017 - Present Pittsburgh, PA

Research Assistant Pittsbut Created data visualizations to compare accuracy of manual coding of

events.

CMU Dept. of Statistics and Data Science

Aug 2016 - Dec 2017

Teaching Assistant

Pittsburgh, PA

Led weekly labs using Minitab that enforced statistical methods taught in class. Graded homework and exams.

Center for Machine Learning and Health

May - Sept 2017

User Research Intern

Pittsburgh, PA

Designed a large-scale study to explore human perceptions of fairness, trust, and emotion regarding the human-in-the-loop scenario and algorithmic decisions. Created data cleansing scripts and ran statistical analyses.

Ubiquitous Computing Lab

Jun - Sept 2017

Research Assistant

Pittsburgh, PA

Visualized and analyzed mobile data collected from Fitbit to determine significant features that measure and predict psychological resilience in university students.

PROJECTS

Meaning Bee

Aug 2017 - Present

Co-designing a learning game with middle school students in the Pittsburgh area. Working on UX research and design.

Visualizing Patient Data to Improve Cancer

Aug 2017 - Present

BHCI Capstone Project. User Research Lead.

Working to create a dashboard visualization of patient generated data to improve pancreatic cancer readmission rates and improve the efficiency of patient visits.

MealExpress

Aug - Dec 2017

Conducted user research to improve the campus dining experience. Emphasis on creating both a technically feasible and physically implementable solution.

When Humans and Algorithms Work Together

Sept 2017

When Humans and Algorithms Work Together: Understanding Perceptions of Human-in-the-Loop Algorithmic Decisions.

Co-authored research paper on the differences between how humans perceive algorithmic, human, or human-in-the-loop decisions.

Chat Based-Sentiment Analysis Extension for Twitch Streams Dec 2016 Designed chrome extension that generated visual representations of live data collected from Twitch and conducted sentiment analysis using AlchemyLanguage.
